## EDUCATION

**Seneca Polytechnic** — Toronto, ON

Advanced Diploma, Computer Programming & Analysis | Aug 2024

GPA: 4.0/4.0 (High Honors)

## EXPERIENCE

### QA Analyst — Ontario Ministry of Education

Toronto, ON | Jan 2023 – Aug 2023

- Investigated and analyzed 200+ application defects across enterprise web applications using Jira, SQL, and backend validation techniques
- Collaborated with developers and stakeholders to isolate root causes, validate fixes, and improve application reliability
- Performed API validation, database verification, and regression testing to support stable software releases
- Participated in Agile development cycles, contributing to release readiness and production-quality deliverables
- Executed data-driven troubleshooting by reviewing system behavior, logs, requirements, and test outcomes

### Teaching Assistant — Seneca Polytechnic

Toronto, ON | Sep 2023 – Aug 2024

- Supported 40+ students in debugging applications, troubleshooting code, and resolving technical issues across Java, SQL, and web development courses
- Assisted in identifying logic errors, improving code quality, and reinforcing software engineering best practices
- Communicated complex technical concepts through one-on-one mentoring and group instruction
- Evaluated assignments for functionality, maintainability, and adherence to development standards

### Machine Operator — Hood Packaging

Cornwall, ON | Jan 2025 – Apr 2026

- Investigated process anomalies, documented operational data, and collaborated with teams to resolve production issues in a fast-paced environment
- Maintained quality standards through detailed monitoring, troubleshooting, and process verification

## TECHNICAL SKILLS

**Languages:** Java, Python, JavaScript, TypeScript, SQL, C, C++

**Frontend:** React, Next.js, Redux, HTML, CSS

**Backend:** Node.js, Express.js, .NET Core

**Databases:** MongoDB, PostgreSQL, MySQL, Oracle, SQL Server, SQLite

**Cloud & Tools:** AWS (EC2, S3), Azure, Git, Jira, VS Code, IntelliJ

**Concepts:** REST APIs, Authentication (JWT/OAuth), System Design, OOP, Agile, Debugging, Data Validation

## PROJECTS

### [Beyond Borders \(Full-Stack Social Platform\)](#)

- Developed a scalable social networking platform using Next.js, Node.js, Express.js, and MongoDB
- Designed and implemented RESTful APIs, JWT authentication, user management, and real-time messaging functionality
- Integrated frontend and backend services while optimizing database operations and request handling performance
- Built responsive user interfaces and resolved cross-stack issues through systematic debugging and testing

### [Format Converter \(Web Utility App\)](#)

- Developed a web-based image conversion platform supporting multiple file formats and streamlined file-processing workflows
- Implemented upload, conversion, and download functionality with a focus on performance and usability
- Improved application responsiveness through efficient client-server communication and optimized processing logic
